Lucy Elen Krystalli

Dallas – Fort Worth, TX | (469) 773-3802 | lekrystallis@gmail.com
Linkden | Mechanical Engineering Portfolio

Professional Summary

Mechanical Engineering student at the University of Texas at Dallas with experience in introductory engineering projects and involvement in Dallas Formula Racing. Currently developing SolidWorks CAD skills and preparing for the Certified SOLIDWORKS Associate (CSWA) examination. Interested in hands-on product development, mechanical design, prototyping, and manufacturing. Eager to contribute to an engineering team while building practical industry experience.

Education

University of Texas at Dallas — Richardson, TX
Bachelor of Science in Mechanical Engineering | Expected Graduation: May 2029

Experience

Dallas Formula Racing — UT Dallas
Powertrain, Exhaust Subteam | August 2026 – Present

- Member of the Powertrain Subteam, contributing to the exhaust system's flow and acoustic simulation efforts.
- Developing skills in ANSYS through student training materials, with a focus on understanding fluid flow and acoustic analysis.
- Created CAD models of chain links and plates for the Formula Racing team, strengthening component modeling and mechanical design skills.
- Collaborate with fellow engineering students on technical challenges related to race car design and development.

Mechanical Engineering Coursework Projects — UT Dallas
January 2026 – Present

- Completed introductory engineering assignments and small-scale projects involving technical analysis, design, and problem-solving.
- Applied engineering principles to evaluate project requirements and develop solutions.
- Practiced documenting engineering work and communicating technical findings.

Skills

- **CAD & 3D Modeling:** SolidWorks (developing proficiency), 3D part modeling, mechanical component modeling, CAD design fundamentals
- **Engineering Simulation:** ANSYS (currently learning), introductory fluid flow and acoustic analysis concepts
- **Product Design:** Concept development, functional design, design iteration, peer feedback evaluation
- **Engineering & Analysis:** Engineering calculations, introductory mechanical design, technical problem-solving
- **Professional Skills:** Engineering teamwork, technical communication, collaboration, adaptability

Certifications

- **Certified SOLIDWORKS Associate (CSWA)** — In Preparation
  Target completion: End of 2026–2027 academic year
- **ANSYS Student Training** — In Progress
  Fluid Flow and Acoustic Simulation Fundamentals

Projects

Screwdriver with Integrated Screw Storage — Product Design Project
Mechanical Engineering Coursework | UT Dallas, 2026

- Conceptualized a multifunctional screwdriver featuring a twist-operated compartment for storing screws.
- Developed the design to improve convenience by combining screw storage and a hand tool into one product.
- Collected peer feedback on the initial concept and identified potential improvements for future design iterations.
- Gained experience in product ideation, user-centered design, and iterative development.

Spin Drive — CAD Modeling Practice
Independent CAD Development | 2026

- Practiced 3D CAD modeling through a Spin Drive mechanical design exercise.
- Developed skills in geometric modeling and mechanical component design.
- Strengthened familiarity with CAD tools and modeling workflows.
